DOCKER CLI INSTALLATION

The screenshot shows the Docker Desktop application window. The top bar is blue with 'Docker Desktop' and an 'Update to latest' button. On the left, a sidebar contains navigation links: Containers, Images, Volumes, Dev Environments (with a BETA badge), Extensions (with a BETA badge), and Add Extensions. The main area is titled 'Images on disk' and shows a summary: 'Last refresh: less than a minute ago', '9 images', '2.69 GB total size', and '2.69 GB / 2.69 GB in use' with a 'Clean up' button. Below this, the 'Images' section is active, showing a list of local images. A search bar and a checkbox for 'In use only' are at the top of the list. The table has columns for NAME, TAG, IMAGE ID, CREATED, and SIZE. Images listed include busybox, docker/getting-started, gcr.io/k8s-minikube/kicbase, mariadb, mongo, mongo-express, php, redis, and redis. At the bottom, there's a 'Connect to Remote Content' section with three options: 'Store and backup your images remotely', 'Unlock vulnerability scanning for greater security', and 'Collaborate with your team'. A 'Sign in' button is present. The bottom status bar shows 'RAM 3.79GB', 'CPU 0.12%', 'Not connected to Hub', and 'v4.12.0'.

NAME	TAG	IMAGE ID	CREATED	SIZE
busybox	latest	2d0d8216f525	25 days ago	1.46 MB
docker/getting-started	latest	157095baba98	7 months ago	27.37 MB
gcr.io/k8s-minikube/kicbase	v0.0.34	9e28dc02239f	3 months ago	1.06 GB
mariadb	10.1	19b462edd5fd	over 1 year ago	333.62 MB
mongo	latest	d36734b2913a	about 2 months ago	666.81 MB
mongo-express	latest	ce615669da5e	about 1 year ago	135.57 MB
php	7.2.1-apache	23850003068f	almost 5 years ago	336.48 MB
redis	latest	9fb1c428ea15	about 2 months ago	111.15 MB
redis	4.0	7a8c2384752f	over 2 years ago	83.49 MB
